

MOBILE SERVICES:

StL Diagnostic Imaging takes Accessibility barriers out of the way so that clients and their loved ones can rest knowing they are in good hands and can obtain the highest level of quality service they need right to their doorstep. Obstacles can be challenging at times so why not let StL Diagnostic take care of this for you? We have an extensive team of mobile professional Sonographers and Medical Radiation Technologists who will bring service directly to your home. Our team is trained on communicating, interacting and problem solving for those with disabilities, so that they may obtain equitable service on a level playing field. Whether it be at your private home, Retirement Home or in a Long Term Care Home, our Team will work in conjunction with your personal health support team to get the services you need.

- Our mobile services require a [Pre-Home Care Service Questionnaire](#) to ensure we can get our equipment into your front door.
- In a Retirement Home or LTC setting, we work closely with the nurses, nurse practitioners, doctors and personal support workers who are providing health care to get you the results and services you need.
- Our X-ray and Ultrasound equipment undergo quality assurance tests on a regular basis and they are closely monitored so that we can provide quality images and data for your health care team so that they can make the best decisions for you.
- Our Mobile service is an excellent option for clients who have mobility restrictions, or any disability that impedes access to services.
