PRE-HOME VISIT SERVICE QUESTIONNAIRE

Our company has been contacted to come to your home to perform diagnostic imaging. Before an appointment can be scheduled, we need ask a few questions to determine if we have adequate safe accessibility to your home for our equipment and staff. This information will be reviewed by the x-ray/ultrasound technologist prior to arrival.

Retirement Homes: Require only the 3rd and 4th question to be answered and can be answered by a staff member of the home.

1. Are there steps leading up to your front door? If yes, how many? How tall are the steps? Do you have a ramp for wheelchair access?

Our company policy states the x-ray equipment cannot be brought up more than two steps in total (outside and inside combined). However; depending on the height of the step, there are exceptions). Our X-ray equipment is large and heavy, and cannot be easily lifted (Ultrasound equipment does not apply to these restrictions).

2. Do you have legal, accessible parking available on site if this is a private home?
3. Will the patient be on the main floor where the servicing technologist enters the home (required for private home exams)? If not, is there an elevator to reach the resident floor?
4. What is the approximate weight and height of the patient?
5. Supine exams (e.g., abdomen, pelvis, hips, spine):
 - Is the patient in an adjustable hospital bed?
 - If no, what type of bed are they in and is the bed open underneath for accessibility of imaging equipment?
 - If no, is this bed adjustable? (Raise up and down, sit up and back)
6. Is there a clear 3' foot wide path to gain entry to this home location?
Note: During the winter season snow must be cleared and pathway salted prior to the StL technologist's arrival. Furniture and personal items cleared.
7. Do you have a pet? The pet must be segregated from the main floor site prior to the technologist's arrival.
8. Any homes with an overabundance of clutter or unsanitary conditions pose as a safety risk and will not be serviced. Service will remain suspended until proof of improved environment circumstances is obtained. The ordering physician will be notified.
9. The accompanying chaperone for the exam must be present and if there is a change of availability on the day of your appointment, the exam will be rescheduled. IF THIS HAPPENS, PLEASE CONTACT OUR OFFICE IMMEDIATELY. Confirmation of an accompanying friend or family member is required, otherwise the service call will be suspended until further notice.

Please note that we may not be able to perform the study due to accessibility, potential safety hazards and space constraints. Every examination and situation are varied. In some instances, the technologist may cancel the examination upon arrival. This decision is based on their professional assessment and discretion.
