ULTRASOUND PREPARATION

Preparation Instructions for Mobile Ultrasound Services

Abdomen

- Modified Diet containing NO MEAT, FAT, OR DAIRY on day of exam until completed.
- Clear fluids only to be served with meals
- Patients may take all medication as required with a small amount of water

Abdomen and Pelvis

- Restricted Diet (see above) in addition to a full bladder
- A full bladder is required: drink 1L (four 8 oz glasses) of water one hour before the examination
- The mobile technologist will call the day before to advise of when to start drinking water. Do not void until the sonographer instructs you to do so (understandably this may be difficult at times so best efforts are encouraged)
- Take usual medication with water

Pelvis

- A full bladder is required: drink 1L (four 8 oz glasses) of water one hour before the examination for Pre and Post Void studies.
- The mobile technologist will call the day before to advise of when to start drinking water. Do not void until the sonographer instructs you to do so (understandably this may be difficult at times so best efforts are encouraged)

All Other Exams

- No preparation is needed

**Please note examinations requiring the above preparations may not all be completed prior to lunch. The directions provided will need to be followed for the duration of the scheduled appointment date.*

**Our professional mobile staff will call the day prior to notify you of the time frame in which to expect arrival for service so that you can be informed and prepared.*

**In all circumstances, collaborative efforts to work together with support staff and healthcare teams to successfully complete exams are appreciated.*
